INDUSTRIAL EXPERIENCE

Uber

Jun. 2025 - Aug. 2025

Advisor: Jeffery Shen

Research Scientist Intern, Uber San Francisco

- Conducted large-scale user tipping behavior analysis and constructed a sequential user behavior dataset on billions of logs with Spark;
- Prototyped and helped productionize Epidemic Neural Recommenders (ENR) to enhance the non-linear representation learning capability of Uber's contextual bandit platform for usage across the company;
- Prototyped and helped productionize large-scale customized Decision Transformers (DT) to model sequential user behaviors and to automate time series feature engineering; Beat the current SOTA user behavior prediction model on internal datasets by over 30%.

Amazon

Advisor: Dr. Prag Mishra

Jun. 2021 - Aug. 2021

Applied Scientist Intern, Amazon Seattle

- Analyzed billions of delivery trajectories to identify the bottleneck in delivery route planning;
- Proposed an online reinforcement learning agent that tunes the delivery route planning algorithm's hyperparameters automatically based on recent performance;
- Improved delivery efficiency by 15% compared to the previous algorithm.
